

Memorandum

To: Janet Boling
From: Kelly Borak, Street Superintendent
Date: April 18, 2006
Subject: 2006 Street Resurfacing

On Thursday, April 20th 2006, the Village of Tinley Park will begin its Pavement Management Program, resurfacing 38 streets within our community and patching another 5. The scope of this work includes curb replacements, storm sewer frame adjustments, street resurfacing and street patching. Alpha Construction Company will perform the resurfacing work for the Village and will be sending letters to affected residents with information on date and times work will be done in each respective area. Please note that curbs are only replaced if there is a drainage issue. We do not replace curbs for cosmetic issues. Davis Concrete will be performing the patching work.

For your information, a map outlining the areas that will be repaired is posted below. Motorists are urged to exercise caution while driving near the work area(s).

Thank you in advance for your patience and cooperation during this project. If you have additional questions, please contact the public works department at 708-444-5500.
