

Construction continues at Village Hall

Posted: Aug. 14, 2025

Work continues on upgrades to Tinley Park Village Hall, 16250 S. Oak Park Avenue.

Exterior improvements include new concrete, brick pavers, new flag poles, upgraded landscaping, repairs to the irrigation system, lighting, and a more visible open look to the main entrance of the building. Exterior work will continue through the fall.

Interior upgrades include renovations to the lobby and restrooms, new flooring, painting, and lighting. Interior work is scheduled to start after the exterior work has been completed.

Although the work area has been fenced off, residents can still enter Village Hall on the south side of the building.
