

Sanitary system work underway

Posted: April 10, 2026

The Village has contracted with Visu-Sewer for the 2026 Sanitary System Rehabilitation Program, which began this week. The project consists of cleaning, prepping, tuckpointing/sealing, and coating the sewer manholes as detailed in the red, blue, and green colored sections [on this map](#).

The project is not expected to have an impact on residents other than a truck and trailer parked on the street during work. All work will be in the Village right of way, with no need to enter homes. The contractor will post door hangers to homes in the work area as they move along. Work is weather-dependent and expected to be completed by July 3.
