Material Extinguished

Hazardous Material

Garbage truck load fire in Oak Forest on Friday, October 7th, 2022.

For the safety of your neighborhood and our drivers, please do not place flammable materials in your curbside garbage cart. Above is an example of what happens when any of these flammable materials are deposited in your garbage or recycling carts. The driver followed safety procedures and emptied the material onto the street for the fire department to easily access. The street was quickly cleaned up after the fire. These materials need to be specially disposed of during local neighborhood hazardous waste events or brought to hazardous waste collection locations.
