Scope

Specifications and Prosecution of Work
No work shall be preformed unless a callout is issued to the contractor by the Village.

Background
The Village of Tinley Park, Illinois, hereinafter referred to as the Village, is primarily a residential community of nearly 60,000 people situated approximately 25 miles southwest of downtown Chicago. Throughout the winter months, the Village experiences snowfalls that require removal of all snow from Village streets, including cul-de-sacs.

Problem Statement
During snow removal operations, full-time staff priorities are to remove snow from residential streets, downtown parking lots and sidewalks around Village owned properties. Cul-de-sacs are done on a lower priority basis. It is the intention of the Village to improve services to cul-de-sacs by selecting a qualified contractor to remove the snow, by sections, from 252 cul-de-sacs/eyebrows located throughout the Village (see attachment A).

It is the intent of the Village to retain a contractor on-call from November 15, 2017 through April 30, 2018 with two-one year extension options. The contractor will provide 24-hour service including Saturdays, Sundays and holidays. The contractor will provide all labor and equipment to maintain traffic flow in all designated cul-de-sacs at all times.

Project Scope
The contractor will provide, at a minimum, the following:

- Remove snow on all cul-de-sacs listed in Attachment A. The term “cul-de-sac” is defined as the “throat” or straight portion of the dead-end street as well as the “bubble” or round portion of the street.
- List the hourly cost for removal of snow for full routes. There could be one or more routes we will need covered. Attachment B
- Perform any and all additional work, as requested by the Street Superintendent or designated staff, for the unit cost indicated on the Proposal Sheet.

Proposal Requirements
The contractor’s proposal shall include, as a minimum, the following information:
**Qualification of the contractor:** Under the terms of this proposal, all contractors, in evidence of their experience and past performance, must submit a list of previous snow removal experience of similar magnitude, which will be used to verify ability and level of service. All determinations as to contractor qualifications shall be made by the Village and shall be final.

**Equipment:** It is critical to have good communication during snow removal operations. The contractor will be required to have two-way radios in that portion of his fleet serving the needs of this proposal. In addition, the supervisor’s vehicle shall be equipped with a cellular telephone. The contractor will provide a list of equipment, including year make and model, size plow or bucket and type of radios available for snow removal operations on this proposal. The following equipment is required as a minimum:

1. Twelve (12) all-wheel-drive pickup trucks, radio equipped, or equivalent.
2. Four (4) rubber tired end loader or skid-steer-type loader.
3. Cellular telephone in supervisor’s vehicle.

A list additional available equipment such as end loaders (including bucket capacity), dump trucks, etc that may be employed in the event of a heavy snow fall.

**The Proposal:** The proposal form must be completed and enclosed. Failure to use the proposal sheet, or failure to completely fill out this form, shall be grounds for rejecting the proposal.

**Insurance Requirements:**
The contractor shall procure and maintain, for the duration of the contract, insurance against claims of injuries to persons or damages to property, which may arise from or in connection with the performance of the work hereunder by the Contractor, his agents, representatives, employees or subcontractors.

Satisfactory certificates of insurance shall be filed with the Village prior to starting any work on the contract. The certificates shall state that seven (7) days advance written notice will be given to the Village before any policy covered thereby is changed or canceled.
