

Village honored as Green Power Community

Issued: April 26, 2019

Sharon Durling with the Northern Illinois Municipal Electric Collaboration (NIMEC) and Chuck Sutton with MC Squared, the Village's electric aggregation provider, recently presented the Village with a Certificate of Community Partnership from the U.S. EPA Green Power Partnership.

This award recognizes the Village's efforts to reduce the risk of climate change through the use of green power. Of all of the EPA Green Power Communities, the Village was recently recognized as No. 5 in the nation based on percentage of green power used.

The Village would also like to recognize the efforts of the Environmental Enhancement Commission for working closely with NIMEC and MC Squared to ensure the success of our electric aggregation program.
