

## **Stay informed with iCAL, eNotify**

Issued: Aug. 9, 2019

Visitors to the Village website can use the iCal feature to add events to the personal calendars on their smartphones and desktop computers.

To use the feature, simply visit the Village calendar and click on the particular event you'd like to add. In the box that pops up, hit the red "iCal" button and follow the on-screen prompts. It's that easy!

Users can also use the iCal feature at the top of the main calendar, but keep in mind that this will add ALL events to your calendar.

The Village also offers eNotify, which allows residents to sign up for notifications whenever selected pages on the website are updated with new information. Find out more by visiting the [Connect with the Village](#) page.
